

Adolfo Aryori Floreano Garth

Junior Backend Developer | Java | Spring Boot | REST APIs | MySQL

Bluefields, Nicaragua | +505 86085174 | agarth867@gmail.com

GitHub: <https://github.com/aryorisgarth>

Professional Summary

Backend-focused developer with experience building full-stack applications and designing REST APIs. Strong foundation in Java and MySQL, with practical experience implementing authentication, role-based access control (RBAC), and database-driven systems. Motivated to grow as a Java Backend Developer and contribute to scalable backend solutions.

Technical Skills

- 1 Languages: Java, JavaScript
- 2 Backend: Spring Boot (learning & projects), Node.js, Express
- 3 Databases: MySQL
- 4 API Development: REST APIs, RBAC Authentication
- 5 Tools: Git, GitHub, Jira, Visual Studio Code
- 6 Networking: DHCP configuration, basic network administration

Projects

Inventory Management System (Full-Stack Application) Designed and implemented a system to manage construction materials. Developed backend logic, database schema, and authentication with role-based access control (RBAC). Technologies used: Node.js, Express, MySQL.

Academic Web Monitoring System Collaborated in the design and implementation of a web system for academic defense monitoring. Focused on backend logic and database interactions.

Professional Experience

University National Autonomous of León (UNAN-León) – Software & Network Support Jan 2024 – Dec 2025 Configured and maintained institutional network infrastructure, including DHCP configuration and IP assignment. Provided technical support and ensured operational continuity across multiple departments.

Education

Bachelor's Degree in Information Systems Engineering (In Progress) National Autonomous University of León (UNAN-León), Nicaragua
