## RELEVANT PROJECTS & PRACTICAL EXPERIENCE

Construction Inventory Management System 11/2025 - 2025/11  
(Full-Stack Application)

UNAN León

Leon, Nicaragua

- Full-Stack Development: Created a complete application to manage construction material control, spanning from back-end logic to the user interface.
- Authorization (RBAC): Implemented a robust Role-Based Access Control (RBAC) authentication and authorization system to manage different user roles and permissions.

Landing Page for XutLogistic

2025

XutLogistic

Leon, Nicaragua

- Developed a professional, responsive landing page for XutLogistics, a growing logistics business, utilizing React.
- Designed the application to effectively capture clients and present their international purchasing and shipping services.

To-do-app

2025

Proyecto personal

Leon, Nicaragua

- Built a RESTful API using Node.js/Express and MySQL/Prisma to handle CRUD (Create, Read, Update, Delete) operations for tasks.
- Implemented basic user authentication and designed a fully functional user interface.
